

Broening Highway Project

Description: Broening Highway is receiving a reconstruction of the roadway (from Keith Ave to the terminals), which includes new curbs, gutters, drainage, electrical, water mains and street lights. When finished, the road improvements are expected to result in a smoother riding surface.

Broening Highway Update

As of 4/13/2015

South of Keith Avenue:

- Water main installation and testing
- Installation of the 21 inch storm drain to alleviate the ponding/flooding
- Roadway and driveway construction
- Light and signal pole foundation installation.
- Concrete railing installation

North of Keith Avenue:

- Street light and signal conduit installation
- Signal and street light pole concrete base installation
- Asphalt base repairs and overlay of entire roadway from Amazon property to Holabird Avenue
- New concrete railing installation
- Sidewalk installation
- Remainder of water main installation north of Keith Avenue

Expected completion October 2015
